

ASINU KUMARAGE

SOFTWARE ENGINEER INTERN

Address: Kalutara, Sri Lanka | **Phone:** +94 77 1786294 | **Email:** asinuu07@gmail.com
LinkedIn: [linkedin.com/in/asinuuu](https://www.linkedin.com/in/asinuuu) | **GitHub:** github.com/asinugit

SUMMARY

Third-year Software Engineering undergraduate at SLIIT with hands-on experience in full-stack development and scalable backend systems. Skilled in building modern web and mobile applications using the MERN stack, Spring Boot microservices, Flutter, Firebase, Docker, and Kubernetes. Experienced in developing secure RESTful APIs, authentication systems, payment gateway integrations, and AI-powered features using Google Gemini API. Passionate about clean architecture, system scalability, and real-world software solutions. Seeking a Software Engineering Internship to contribute to impactful engineering projects while expanding technical and professional expertise.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT), Malabe <i>BSc (Hons) in Information Technology - Specialization in Software Engineering</i>	2023 – 2027 (Expected)
Kalutara Vidyalyaya <i>G.C.E. Advanced Level - Commerce Stream</i>	2018 – 2021

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Java, Python, Kotlin, Dart, C/C++, SQL
Frontend:	React.js, Next.js, HTML, CSS, Tailwind CSS, Flutter
Backend:	Node.js, Express.js, RESTful API Design
Databases:	MongoDB, MySQL, Microsoft SQL Server, Firebase Firestore
Testing:	Jest, Supertest, Playwright, Postman
DevOps & Cloud:	Git, GitHub, Docker, Kubernetes, Vercel, Firebase
Concepts:	REST APIs, MVC Architecture, Agile/Scrum, Microservice Architecture

PROJECTS

Greenvy – Sustainable Product Rating Platform | [Live Demo](#) | [GitHub Repo](#)

Tech Stack: Node, Node.js, Express.js, React, MongoDB, Google Gemini API, Jest, Supertest

- Developed the Blog Management and Education Hub module for a sustainability-focused platform aligned SDG 12.
- Designed and implemented a blog approval workflow where user-submitted blogs are stored with pending status and reviewed by admins before publication.
- Integrated Google Gemini API for AI-powered content moderation to detect inappropriate, toxic, or off-topic sustainability content before publishing.
- Built an AI-driven Education Hub feature that validates SDG-12 relevance and generates structured educational content including summaries, quizzes, glossary terms, actionable tips, and sustainability learning guides.
- Implemented secure RESTful APIs with authentication, role-based access control, pagination, blog engagement features (like/unlike), and MongoDB schema validation.
- Applied service-based backend architecture with Express controllers, middleware, and Mongoose models for scalable and maintainable development.

Healthcare Management Platform (Spring Boot Microservices) | [GitHub Repo](#)

Tech Stack: *Spring Boot, Microservices, Docker, Kubernetes, MongoDB, Stripe API, React*

- Developed the Patient Service and Payment Service for a healthcare management platform using microservice architecture.
- Implemented patient profile management features including viewing and updating personal details.
- Built medical report management functionality with upload, edit, and delete operations for patient records.
- Developed prescription and medical history modules to allow patients to access previous reports and doctor-issued prescriptions.
- Integrated Stripe payment gateway for secure online consultation fee payments after appointment confirmation.
- Implemented payment history features enabling patients to view and download completed payment records.
- Containerized microservices using Docker and deployed services using Kubernetes for scalable application management.
- Developed secure RESTful APIs and applied service-based architecture for maintainable and scalable backend development.

Photography Management System | [GitHub Repo](#)

Tech Stack: *Spring Boot, Java, MongoDB, React, REST API*

- Developed the Staff Management module for a photography studio management system.
- Implemented photographer availability tracking and event assignment based on schedules.
- Built staff profile management features with role-based access and work detail handling.
- Developed work duration tracking to support photographer performance and payment calculation.
- Integrated secure RESTful APIs using Spring Boot and MongoDB for staff and assignment management.
- Applied layered backend architecture using controllers, services, and MongoDB models for scalable development.

Helpo – Worker Support & NGO Platform | [GitHub Repo](#)

Tech Stack: *Flutter, Firebase, Firestore, Firebase Authentication*

- Developed the Job Board module for a mobile application supporting informal workers and NGO services.
- Implemented job posting, job viewing, and filtering features using Flutter and Firebase Firestore.
- Enabled workers to discover job opportunities, training programs, and support services through a centralized platform.
- Integrated real-time database updates and secure user authentication using Firebase Authentication.
- Designed responsive mobile UI components to improve accessibility and user experience.
- Contributed to a social impact solution aligned with UN SDG 8 (Decent Work and Economic Growth).

Other Projects

- **Smart Waste Management System** (Mern Stack) | [GitHub Repo](#) - Developed the Waste Collection and Maintenance Reporting module for a smart waste management platform
- **Petcare App** (Kotlin, Android) | [GitHub Repo](#) - Developed pet care mobile app for our 2nd semester MAD module project

CERTIFICATIONS

- **MongoDB Node.js Developer Path** -MongoDB
- **Diploma in IT**- Esoft Metro Campus
- **Python Programming** - UOM

EXTRA-CURRICULAR ACTIVITIES

- Volunteer Member, Software Engineering Student Community (SESC) – SLIIT
- Volunteer Member, IEEE Student Branch – SLIIT
